PROFESSIONAL EXPERIENCE

Since December 2023 Sereact GmbH

Since Jan. 26 — Director of Robotics Application

Lead the Robotics Application team, balancing CI/CD and production development workstreams · Own technical and commercial relationships with enterprise customers (e.g. Alza, Arvato, Rohlik) and their escalations · Drive robot hardware evaluation and vendor decisions for new deployments · Redesigned the team's hiring process and shifted growth strategy toward internal promotion

Jan. 25 - Dec. 25 — Lead Robotics Application Engineer

Led development of customer-facing robotics applications on top of the core platform · Worked directly with customers to scope requirements and deployment plans · Deployed and commissioned robotic stations across EU sites · Mentored and led a team of robotics engineers

Dec. 23 - Dec. 24 — Robotics Engineer

Developed new functionalities for robotic arm manipulation · Improved and refactored the core codebase · Integrated new sensors and hardware devices · Supported customers through deployments and live demos

Dec 2022 – Oct 2023 Instor Projects & Robotics

Mobile Robotics Engineer working with autonomous ground robots

Developed autonomous mobile robot frameworks · Improved the navigation and SLAM stacks for more robust localization · Shipped new autonomy functionalities to production robots

May 2022 – Nov 2022 Postdoctoral Researcher

Researcher conducting research on mobile robotics at ϕ -Robotics Research Lab

Developed Jaguar's autonomous navigation system and a multi-robot fleet manager · Supervised master's and undergraduate students in the ϕ -Robotics group · Proposed, led, and published original research in mobile robotics

Dec 2021 – Nov 2022 Robotics Software Engineer, Jaguar

Development of a system to manage a fleet of robots in collaboration with Instor

Built the localization system and trajectory planner for autonomous ground robots · Led the development team and documented the system for long-term maintainability · Supported Instor's field deployment of the platform

Sep 2020 – Nov 2021 Robotics Software Engineer, Jaci

Development of an autonomous disinfection robot in collaboration with Instor

Developed the trajectory planner for an autonomous disinfection robot · Validated the planner through simulation and real-world experiments · Led the development team and supported Instor's field deployment

Aug 2019 – Apr 2020 Exchange PhD Student, UiO

Research Project at the Robotics and Intelligent Systems, University of Oslo, Norway

Co-advise master students to develop UAV localization systems · Research exploration, object searching, and mapping algorithms · Teach Mobile Robotics for the course Advanced Topics in Artificial Intelligence for Intelligent Systems · Report the experience for further improvements of the exchanging student program

EDUCATION

Mar 2017 – May 2022 Federal University of Rio Grande do Sul

φ-Robotics Research Lab

Doctorate in Computer Science · *Specialization in Mobile Robotics*

Thesis: *Exploiting organisational semantic information in indoor environments for the object search problem*

Tutor in the course of Algorithms during the 3rd semester

Under orientation of Prof. Dr. Mariana Luderitz Kolberg

Mar 2015 – Feb 2017 Federal University of Rio Grande do Sul

φ-Robotics Research Lab

Master of Science in Computer Science · *Specialization in Mobile Robotics*

Thesis: *A Novel Measurement Model for the Monte Carlo Algorithm Applied to the UAV Localization Problem Using Satellite Images*

Tutor in the course of Algorithms during the 2nd semester

Under orientation of Prof. Dr. Mariana Luderitz Kolberg

Mar 2011 – Feb 2015 Federal University of Mato Grosso

Bachelor of Science in Computer Science

Thesis: *Evaluation of Combined Classifiers Applied to the Diagnosis of Childhood Pneumonia*

Tutor in the course of C Programming during the 7th semester

Developed an autonomous car using Lego Mindstorms

Under orientation of Prof. Dr. Rafael Teixeira

EXTRA-CURRICULAR ACTIVITIES

Aug 2022 – present Amigos Brasileiros

Volunteering

Staff member

Assisted and helped international students living in Porto Alegre

Mar 2010 – present Order of DeMolay

Volunteering

Held different positions such as President of the State of Mato Grosso and Treasurer and managed public affairs

Received individual and group awards for outstanding leadership skills

COMPUTER AND LANGUAGE SKILLS

Frameworks ROS 2, Docker, MongoDB, AIOHTTP, OpenCV

Programming C++, C, Python, Git

Language Portuguese, English, Spanish

Interests Teaching · Travelling · Podcasts
